-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

1. Claims 46 and 51 are objected to because of the following informalities: The claims utilize the word "its" in the claims. It is unclear what "its" refers to in each claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 46-51 are rejected under 35 U.S.C. 102(b) as being anticipated by Anderson (4,832,686).

Anderson discloses a bioabsorbable means for applying a therapeutic agent to a biopsy site and further disclose a mass of material that is detectable by at least two imaging detection methods when introduced into the cavity site created when the tissue has been removed; the mass remains at the site for at least a first time period after the introduction into the cavity site created when tissue has been removed and does not interfere with imaging during a second time period after the first time period; the mass remains imageable for the first time period and clears from the site during the second time period; and the marker is detectable by at least two of the following imaging

methods: MRI, ultrasound, x-ray, mammography or fluoroscopy. See Column 4, lines 8-33; and Column 7, lines 4 and 41-51.

The disclosure of a radiopaque marker inherently discloses the ability to remotely image the marker using x-ray and/or fluoroscopy. Furthermore, the ability of the material to degrade in a specified period of time would also inherently disclose the ability to image the site for a first predetermined time and not interfere with imaging during a second time period.

Response to Arguments

4. Applicant's arguments with respect to claims 46-51 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Szmaj who's telephone number is (571) 272-4733. The examiner can normally be reached on Monday-Friday, with second Fridays off.
